

WORKSHOP STAFF
Home Demonstration Workshop

Reserve

Purdue University
LaFayette, Indiana
March 4-16, 1948

Frank W. Peck

- Agricultural economist, formerly Director of Extension and Director of the Experiment Station, University of Minnesota, and later President, Federal Land Bank, St. Paul. Now Managing Director, The Farm Foundation, Chicago. An agricultural leader who has had opportunity to study extension from within and without.

Dr. Ralph W. Tyler

- Head, School of Education, University of Chicago. Formerly a member of the Department of Educational Research, Ohio State University. An early leader in the development of the workshop technique and at present a consultant of the Extension Service, U. S. Department of Agriculture. Has had much experience with business training and research programs, as well as with extension workshops.

Dr. Rowland Egger

- Director, Bureau of Public Administration, University of Virginia. Served for 4 years as budget director for the State of Virginia, and during World War II was manager of the Bolivian Development Corporation. Member of several national and international committees on public administration. A leader in public administration with much practical experience. Dr. Egger is with the School of International Affairs, Columbia University.

Dr. Regina Westcott
(Mrs. Henry N. Wieman)

- Consultant psychologist since 1926. At present at the University of Arkansas. B.A. Occidental College, 1918, Los Angeles. M.A. Berkeley, 1921. Ed.D. Berkeley, 1923. Author - Popularity-1936; The Modern Family and the Church-1937; The Family Lives Its Religion-1941; Does Your Child Obey?-1943; and co-author of Normative Psychology of Religion-1935. Student, University of Paris and College of France, 1925-26.

- Dr. Forrest Clements - Dr. Clements has his B.A. and M.A. from the University of California, Berkeley, California, and Ph.D. in anthropology and psychology, University of California, Berkeley. He was a National Research Council Fellow, Institute of Human Relations, Yale University, New Haven, Connecticut; research assistant, Institute of Human Relations, Yale University, New Haven, Connecticut; professor of anthropology, University of Oklahoma, Norman, Oklahoma; Senior Study Director, Division of Program Surveys, Bureau of Agricultural Economics, U. S. Department of Agriculture, Washington, D. C.; and at present Head of Division of Special Surveys, Bureau of Agricultural Economics, U. S. Department of Agriculture, Washington, D. C. He has written publications in anthropology, psychology, statistics, and survey topics in various journals and government publications.
- Dr. Lee Vincent - Formerly professor of psychology and personality development at Merrill-Palmer Institute, Detroit; now Dean of Home Economics, Cornell University.
- Dr. Edmund deS. Brunner - Dr. Brunner has an official connection with the Department of Agriculture in that he is Special Agricultural Adviser to Extension. His full-time assignment is Professor of Rural Sociology, Columbia University, where he is engaged in both teaching and research. Regularly, some 20 to 25 extension workers scattered throughout the nation go to Columbia University to take work under Dr. Brunner. Most of these people receive Master's degrees either in rural education or rural sociology. During the war, Dr. Brunner served 1 year as assistant county agent in Massachusetts where he was primarily responsible for the farm labor work. Few people have a better grasp of the problems and function of extension than Dr. Brunner. He is sympathetic and at the same time tries to remain objective about extension and its future. He is the author of many books.

- Dr. Robert A. Polson - Dr. Polson is Professor of Rural Sociology Extension at Cornell. He has been in this assignment for some 10 years. During the past 2 years, Dr. Polson has served as chairman of the Cornell Extension Studies Committee. It is to this committee that all extension studies come for analysis and assignment to staff members for research. Dr. Polson is also Secretary for the New York Rural Policy Committee. During the war he headed up the Farm Labor Program in New York. He is now engaged in rewriting the book that he and Sanderson co-authored on "Rural Community Organization."
- Dr. Douglas Ensminger - Dr. Ensminger has a dual role in the Department of Agriculture. He is a joint employee of the Bureau of Agricultural Economics and of the Cooperative Extension Service. In the BAE he is Head of the Section on Rural Organization Research whose work at the present time includes systematic studies of types of rural organization in 22 widely selected counties. Also, a study of much interest to extension is one on organization and participation, being carried on in cooperation with the Maine Extension Service. In Extension, Dr. Ensminger heads up the work in rural sociology extension.

The object of this paper is to show that the
theory of the origin of life is not a
speculation, but a science. It is a science
because it is based on facts, and it is a
theory because it is a hypothesis which
explains the facts. The facts are the
fossils of the earth, and the hypothesis is
the theory of evolution. The theory of
evolution is a hypothesis which explains
the facts of the earth's history. It is a
hypothesis because it is a theory which
explains the facts, and it is a theory
because it is based on facts.

The theory of evolution is a hypothesis
which explains the facts of the earth's
history. It is a hypothesis because it is
a theory which explains the facts, and it
is a theory because it is based on facts.
The facts are the fossils of the earth,
and the hypothesis is the theory of
evolution. The theory of evolution is a
hypothesis which explains the facts of the
earth's history. It is a hypothesis because
it is a theory which explains the facts,
and it is a theory because it is based on
facts.
